TOWARDS OPERATIONALIZING DRIVER DISTRACTION

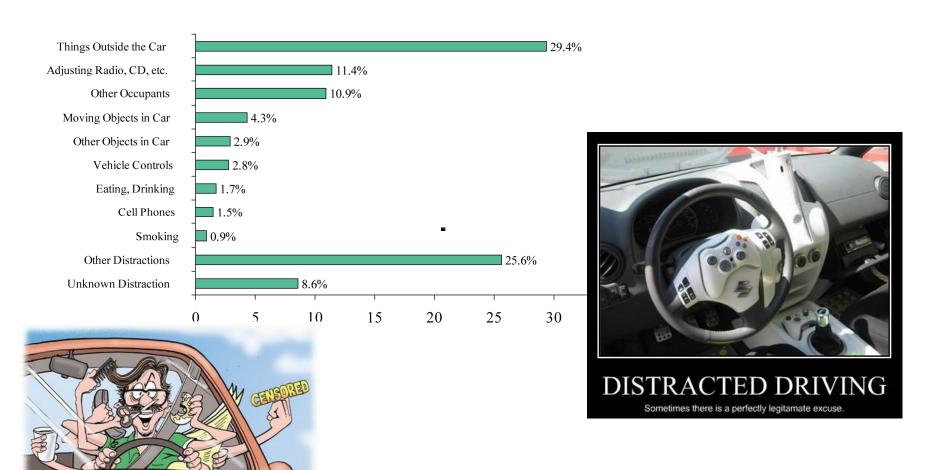

James Foley, Richard Young, Linda Angell, & Joshua Domeyer

Driving Assessment 2013
June 18th

What is Driver Distraction?

What distracts drivers?

Workshop Participants

 A consistent definition of driver distraction is needed for scientific advancement in understanding driver distraction and driving assessment in general:

Workshop Goals

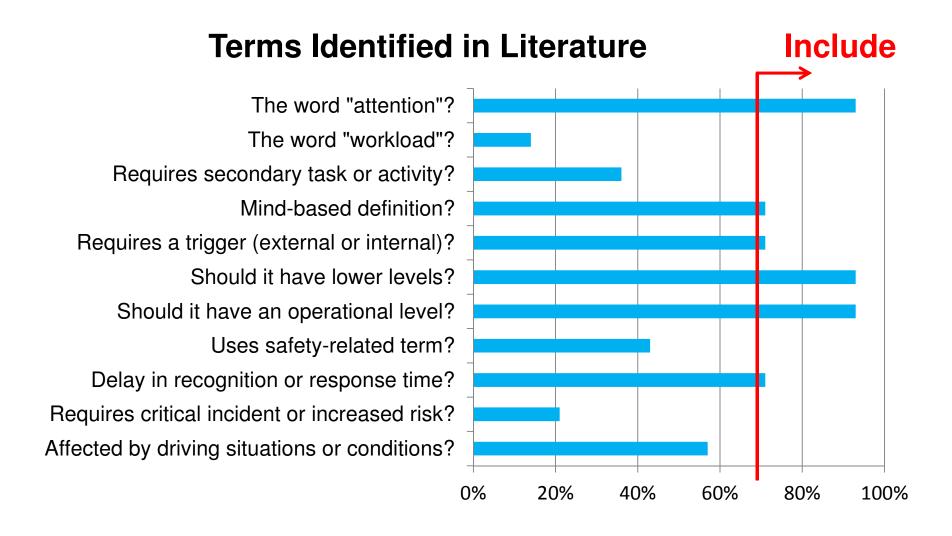

To reach consensus on 3 definitions:

- 1) Top-level definition of driver distraction
- 2a) Definition of visual-manual distraction,
- 2b) Definition of auditory-vocal-cognitive distraction.

Questionnaire Results

Workshop Definition

Broad Definition:

Driver distraction is the diversion of **attention** away from activities critical for **safe driving** toward a competing activity, which may result in insufficient or no attention to activities critical for safe driving. – Regan et al. (2011)

Workshop Definition

Accompanying Definitions:

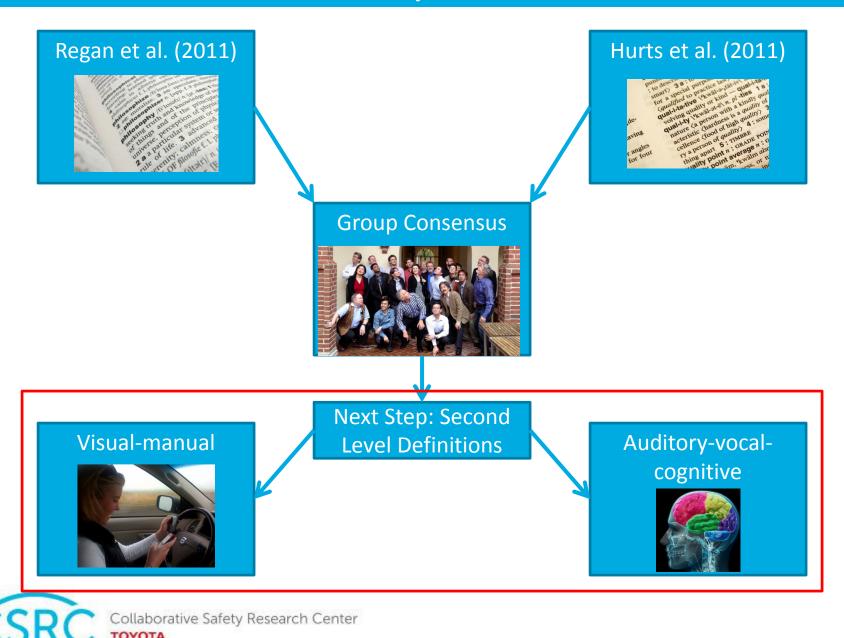

Attention (Posner & Fan, 2008):

- Orienting Selection of sensory information.
- Executive Resolving conflict among responses.
- Alerting Achieving and maintaining an alert state.

Safe driving is operating a motor vehicle in a reasonable and expected manner.

Workshop Method

Workshop Definitions

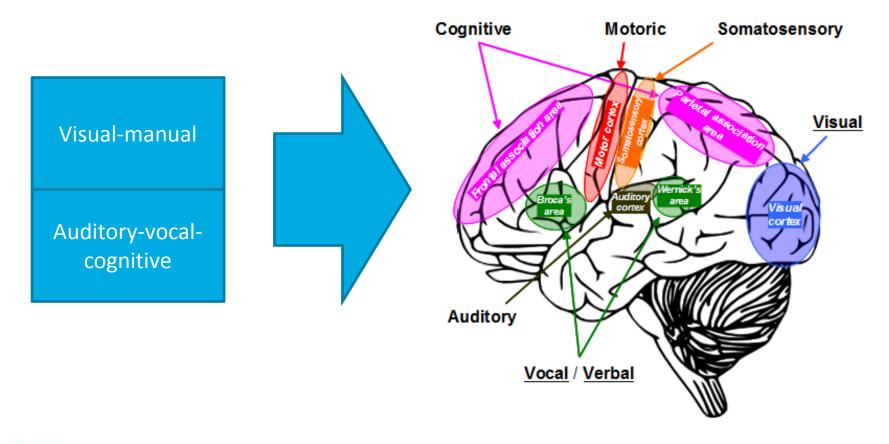

This traditional dichotomy was judged insufficient to address such a multidimensional issue.

Driver distraction can arise from competing activities which place demands upon Cognitive, Auditory, Vocal/Verbal, Visual, Motoric, and Other resources, separately or in any combination.

Workshop Outcome

More inclusive and scientifically-driven categories:
