<td>Table of Contents</td>
<td></td>
</tr>
<tr>
<td>1</td>
<td>In the Context of Whole Trips: New Insights Into Driver Management of Attention and</td>
<td>Linda Angell, Sean Seaman, Rashmi Payyanadan, Wayne Biever (Touchstone Evaluations, Inc.), Bobbie Seppelt, Bruce Mehler, Bryan Reimer (Massachusetts Institute of Technology AgeLab, N.E. University Transportation Center)</td>
</tr>
<tr>
<td>8</td>
<td>Mind-Wandering and Driving: Comparing Thought Report and Individual Difference Measures</td>
<td>Heather Walker, Lana Trick (University of Guelph – CANADA)</td>
</tr>
<tr>
<td>29</td>
<td>The Relationship between Sensation Seeking and Speed Choice in Road Environments with</td>
<td>Tyron Louw, Foroogh Hajiseyedjavadi, Hamish Jamson, Richard Romano, Erwin Boer, Natasha Merat (University of Leeds – UNITED KINGDOM)</td>
</tr>
<tr>
<td>36</td>
<td>Impact of Headlight Glare on Pedestrian Detection with Unilateral Cataract (7)</td>
<td>Sailaja Manda, Rachel Castle, Alex D. Hwang, Eli Peli (Schepens Eye Research Institute, Harvard Medical School)</td>
</tr>
<tr>
<td>50</td>
<td>Real-Time Effects of Age-Related Cognitive Dysfunction on Driver Vehicle Control (9)</td>
<td>Jennifer Merickel, Robin R. High (University of Nebraska Medical Center), Jeffrey D. Dawson (University of Iowa), Matthew Rizzo (University of Nebraska Medical Center)</td>
</tr>

</table>
The Impact of Crosswalk Design on Driver Performance: Implications for Pedestrian Safety (10) Huizhong Guo, Ning Li, Linda Ng Boyle (University of Washington), John K. Lenneman, Tina Sayer (Toyota Collaborative Safety Research Center) ........................................57

Dynamics of Pedestrian Crossing Decisions Based on Vehicle Trajectories in Large-Scale Simulated and Real-World Data (11) Jack Terwilliger, Michael Glazer, Henri Schmidt (Massachusetts Institute of Technology), Josh Domeyer, Heishiro Toyoda (Toyota Collaborative Safety Research Center), Bruce Mehler, Bryan Reimer (Massachusetts Institute of Technology AgeLab & NE University Transportation Center), Lex Fridman (Massachusetts Institute of Technology) ..........................................................................................................................64

Drivers' Assessment of Hazard Perception (12) Daniela Barragan, Yi-Ching Lee (George Mason University) ......................................................................................................................................................71

Withdrawn (13)

Hacking Nonverbal Communication between Pedestrians and Vehicles in Virtual Reality (14) Henri Schmidt, Jack Terwilliger, Dina AlAdawy, Lex Fridman (Massachusetts Institute of Technology) ..................................................................................................................................................78

Design and Evaluation of Adaptive Collision Avoidance Systems (15) Husam Muslim, Makoto Itoh (University of Tsukuba – JAPAN) .................................................................................................................................85

A Survey Study Measuring People's Preferences Towards Automated and Non-Automated Ridesplitting (16) Fangda Zhang, Shannon Roberts (University of Massachusetts Amherst), Claudia Goldman (General Motors Advanced Technical Center Israel – ISRAEL) ..............................................................92

Dark Personality and Road Crashes: Mediating Role of Driver Vengeance and Violations (17) Nebi Sümer (Sabancı University – TURKEY), Bahar Tümer, Uluğhan Ergin, Seda Merve Şahin (Middle East Technical University – TURKEY) ............................................................................................................................................................99

Is Driving Simulation a Viable Method for Examining Drivers' Ethical Choices? An Exploratory Study (18) Anuj Pradhan (University of Massachusetts Amherst), Heejin Jeong, Brittany Ross (University of Michigan) .............................................................................................................................................106

Drivers Fail to Calibrate to Optic Flow Speed Changes During Automated Driving, (19) Callum Mole, Gustav Markkula, Oscar Giles (University of Leeds – UNITED KINGDOM), Yuki Okafuji (Kobe University – JAPAN), Richard Romano, Natasha Merat, Richard Wilkie (University of Leeds – UNITED KINGDOM) ..................................................................................................................................................113

The Effects of Chewing Gum on the Driving Performance of Emergency Medicine Residents After Overnight Shift Work (20) Maricel Dela Cruz, Muhammad Masood Khalid, Ahmed Mostafa, Jeffrey Foster, Geoffrey Kaump, Rita G. McKeever, & Michael I. Greenberg (Drexel University) ..............................................................................................................................................120
An Investigation of Measuring Driver Anger with Electromyography (21) Christopher Saikalis, John Cliburn, Cedric Portea, Yi-Ching Lee (George Mason University) .............................126

Effect of Alert Presentation Mode and Hazard Direction on Driver Takeover from an Autonomous Vehicle (22) Benjamin Cortens, Blair Nonnecke, Lana M. Trick (University of Guelph – CANADA) ....................................................................................................................133

Effects of Inaccurate Gaze Behavior on Young Drivers’ Hazard Anticipation (23) Sarah Yahoodik (Old Dominion University), Nathan Hatfield (Design Interactive, Inc.), Yusuke Yamani (Old Dominion University), Siby Samuel (University of Waterloo – CANADA) .......140

Spatially Biased Eye Movements in Older Drivers with Glaucoma and Visual Field Defects (24) David Anderson, Deepta A. Ghate, Sachin Kedar, Matthew Rizzo (University of Nebraska Medical Center) ..........................................................................................................................147

Comparing Performance when Using a New Style Large Touchscreen Compared to a Traditional In-Vehicle Touchscreen (25) Timothy Brown, Dawn Marshall (University of Iowa), Neil Lerner (Westat) ........................................................................................................154

Using a Driving Simulator to Create a Visual Search Test for Drivers with Parkinson’s Disease (26) Hannes Devos (University of Kansas Medical Center), Maud Ranchet (IFSTTAR – FRANCE), John C. Morgan (Augusta University), Abiodun E. Akinwuntan (University of Kansas Medical Center) ........................................................................................................................................161

Driving Simulator Performance in the Acute Post-Injury Phase Following a Mild Traumatic Brain Injury Among Young Drivers (27) Despina Stavrinos (University of Alabama at Birmingham), Ginger Yang (Nationwide Children’s Hospital), Thomas Kerwin (Ohio State University), Benjamin McManus, Tyler R. Bell (University of Alabama at Birmingham), Alison Newton, Bhavna Singichetti (Nationwide Children’s Hospital) .............168

Task Analysis for Measuring Mobility and Recovery Following Right-Sided TKA: Toward Determining Driver Readiness (28) Bethany Lowndes, Emily Frankel, Haley Kampschnieder, Jennifer Merickel, Kevin Garvin, Matthew Rizzo (University of Nebraska Medical Center) ...............................................................................................................................................175

Magnetoencephalography during Simulated Driving: A New Paradigm for Driver Assessment (29) Elizabeth Walshe (University of Pennsylvania & Children’s Hospital of Philadelphia), Flaura K. Winston, Chelsea Ward McIntosh (Children’s Hospital of Philadelphia), Dan Romer (University of Pennsylvania), Timothy Roberts, William Gaetz (Children’s Hospital of Philadelphia) .........................................................................................................................182

The Effect of a Concussion on the Hazard Anticipation Ability in Teen Drivers (30) Atefeh Katrahmani, Matthew Romoser (Western New England University) .................................................................189
What You See is What You Get? Correspondence of Video and Interview Data on Secondary Task Engagement While Driving-A Naturalistic Driving Study (31) Maria Kreusslein (Chemnitz University of Technology – GERMANY), Katja Schleinitz (Chemnitz University of Technology, TÜV DEKRA arge tp 21 – GERMANY), Markus Schumacher (Federal Highway Research Institute (BASi) – GERMANY) ......................................................196

Predicting a Driver's Personality from Daily Driving Behavior (32) Yuichi Ishikawa, Akihiro Kobayashi, Atsunori Minamikawa, Chihiro Ono (KDDI Research, Inc. – JAPAN) .....203

German Validation of the Prosocial and Aggressive Driving Inventory (PADI) (33) Tanja Stoll, Mirjam Lanzer, Martin Baumann (Ulm University – GERMANY) .........................210

Using Markov Chains to Understand the Sequence of Drivers' Gaze Transitions During Lane-Changes in Automated Driving (34) Rafael Gonçalves, Tyron Louw, Ruth Madigan, Natasha Merat (University of Leeds – UNITED KINGDOM) ....................................................217

The Heterogeneity Principle (35) Ron Knipling (Safety for the Long Haul, Inc.), Anders E. af Wählberg (Cranfield University – UNITED KINGDOM) ......................................................224

Mapping Visual Fields in a Panoramic Driving Simulator Under Different Task Loads in Patients with Glaucoma (37) Deepta Ghate, David Anderson, Jideofor Ndulue, Robin High, Lynette Smith, Matthew Rizzo (University of Nebraska Medical Center) ........................................238

How Long Does It Take to Relax? Observation of Driver Behavior During Real-World Conditionally Automated Driving (38) Kamil Omozik (BMW Group, Technical University of Munich – GERMANY), Yucheng Yang (Technical University of Munich – GERMANY), Isabella Kuntermann, Sebastian Hergeth (BMW Group – GERMANY), Klaus Bengler (Technical University of Munich – GERMANY) .................................................................245

Withdrawn (40)

Driving Simulator Assessment of Fitness-to-Drive Following Traumatic Brain Injury (41) Benjamin McManus, Tyler R. Bell, Despina Stavrinos (University of Alabama at Birmingham) .................................................................259
The Effect of Turn Signal Onset on Lateral Performance Measures When Overtaking a Lead Vehicle - Using Naturalistic Driving Environment (42) Brian T.W. Lin (University of Michigan Transportation Research Institute), Shan Bao (University of Michigan Transportation Research Institute, University of Michigan-Dearborn) ........................................266

Effects of Voluntary Handheld vs. Speech-Based Text Entry on Driving Performance in (Un)Predictable Critical Situations (43) Katja Schleinitz (TU Chemnitz, TÜV | DEKRA arge tp 21 – GERMANY), Tibor Petzoldt (TU Dresden – GERMANY) .........................273

Improving Driver Engagement During L2 Automation: A Pilot Study (44) Anuj Pradhan (University of Massachusetts Amherst), Jacob Crossman (Soar Technology), Adam Sypniewski (Deepgram)  .................................................................................................................................280

Speed Anticipation Characteristic with Optical Flow for Driver Behavior Assessment of Older Drivers (45) Hiroshi Yoshitake, Michinobu Nakanishi, & Motoki Shino (The University of Tokyo – JAPAN) ........................................................................................................................................287

Age and Secondary Task Engagement in Relation to Safe/Unsafe Driving Behavior and Crash/Non-Crash Events (46) Jose Calvo, Carryl Baldwin (George Mason University), Brian Philips (US DOT Federal Highway Administration Office of Safety R&D) .................294

Eye Contact between Pedestrians and Drivers (47) Dina AlAdawy, Michael Glazer, Jack Terwilliger, Henri Schmidt (Massachusetts Institute of Technology), Josh Domeyer (Toyota Collaborative Safety Research Center), Bruce Mehler, Bryan Reimer (Massachusetts Institute of Technology AgeLab & NE University Transportation Center), Lex Fridman (Massachusetts Institute of Technology) ..............................................................................................................301

Posing Questions and Policy Suggestions: Autonomous Vehicles & Climate Change (48) Melody Barnard, Robert Hitt, Michael Norton, Yi-Ching Lee (George Mason University) .....308

A Methodical Approach to Examine Conflicts in Context of Driver - Autonomous Vehicle - Interaction (49) Marcel Woide, Dina Stiegemeier, Martin Baumann (Ulm University – GERMANY) ........................................................................................................................................314

Driving with Foresight - Evaluating the Effect of Cognitive Distraction and Experience on Anticipating Events in Traffic (50) Kristin Mühl (Ulm University – GERMANY), Valentin Koob (Technische Universität Berlin – GERMANY), Tanja Stoll, Martin Baumann (Ulm University – GERMANY) ........................................................................................................321

Driver Behavior in Overtaking Accidents as a Function of Driver Age, Road Capacity and Vehicle Speed: A Case Study in Iraq (51) Husam Muslim, Makoto Itoh (University of Tsukuba – JAPAN) ........................................................................................................................................328

Are Driving Simulators Suitable to Measure the Driving Competence of Elderly Drivers? (52) Ramona Kenntner-Mabiala, C. Maag, Yvonne Kaussner, S. Hoffmann (WIVW GmbH – GERMANY), Markus Schumacher (Federal Highway Research Institute – GERMANY) ..........335
Can Virtual Reality Headsets be Used to Measure Accurately Drivers’ Anticipatory Behaviors? (53) Ganesh Pai Mangalore, Yalda Ebadi (University of Massachusetts Amherst), Siby Samuel (University of Waterloo – CANADA), Michael Knodler, Donald Fisher (University of Massachusetts Amherst) ....................................................................................................................................342

Driving Simulation as Virtual Reality Exposure Therapy to Rehabilitate Patients with Driving Fear After Traffic Accidents (54) Stefanie Schoch, Yvonne Kaußner (Würzburg Institute of Traffic Sciences (WIVW) – GERMANY), A.M. Kuraszkiewicz (University of Würzburg – GERMANY), S. Hoffmann (Würzburg Institute of Traffic Sciences (WIVW) – GERMANY), P. Markel, R. Baur-Streubel, P. Pauli (University of Würzburg – GERMANY) ....349

The Dynamic Merge: Using Traffic Volume Based Signing to Improve Workzone Throughput (55) Starla Weaver (Leidos), Michelle Arnold (US DOT Federal Highway Administration), Tracy Gonzalez, Stacy Balk (Leidos) ..............................................................356

How Demanding is "Just driving?" A Cognitive Workload - Psychophysiological Reference Evaluation (56) Bruce Mehler, Bryan Reimer (Massachusetts Institute of Technology AgeLab & NE University Transportation Center) .............................................................................363

The Conspicuity Benefits of Bicycle Taillights in Daylight (57) Darlene Edewaard, Ellen C. Szubski, Richard A. Tyrrell, & Andrew T. Duchowski (Clemson University) .................................370

Associations Between Cognitive Distortions in Moral Reasoning and Self-Reported Traffic Violations and Crashes for Different Road User Groups (58) Erik Roelofs (Cito – the NETHERLANDS), Pierro Hirsch (Virage Simulation – CANADA), Jan Vissers (RoyalhaskoningDHV – The Netherlands) ..........................................................377

Comparison of Virtual Driving Test Performance and On-Road Examination for Licensure Performance: A Replication Study (59) Elizabeth Walshe (University of Pennsylvania & Children's Hospital of Philadelphia), Natalie Oppenheimer (Children's Hospital of Philadelphia), Venk Kandadai (Diagnostic Driving Inc.), Flaura Winston (Children’s Hospital of Philadelphia) ..........................384

Consumer Confusion with Levels of Vehicle Automation (60) Bobbie Seppelt, Bryan Reimer, Luca Russo, Bruce Mehler (Massachusetts Institute of Technology AgeLab & NE University Transportation Center), Jake Fisher, David Friedman (Consumer Reports) ..........................391

Learning and Development of Mental Models during Interactions with Driving Automation: A Simulator Study, (61) Yannick Forster (BMW Group, Chemnitz University of Technology – GERMANY), Sebastian Hergeth, Frederik Naujoks (BMW Group – GERMANY), Matthias Beggiato, Josef F. Krems (Chemnitz University of Technology – GERMANY), Andreas Keinath (BMW Group – GERMANY) ..........................................................398

Understanding Lane-Keeping Assist: Does Control Intervention Enhance Perceived Capability? (62) John Sullivan, Michael Flannagan (University of Michigan Transportation Research Institute) .................................405
Consumer Comfort with Vehicle Automation: Changes Over Time (63) Chaiwoo Lee, Bobbie Seppelt, Hillary Abraham, Bryan Reimer, Bruce Mehler, Joseph Coughlin (Massachusetts Institute of Technology AgeLab & NE University Transportation Center) ......412

Autonomous Vehicle Interactions with Other Road Users: Conflicts and Resolutions (64) Michael Heymann (Israel Institute of Technology – ISRAEL), Asaf Degani (General Motors R&D Center – ISRAEL) ..............................................................................................................419
